My objective is to obtain a challenging position in a reputable organization that values creativity, innovation, and technical expertise. I am eager to utilize my skills in HTML, CSS, JavaScript, C++, C, Python, and Java, which I have acquired during my college years, to contribute to the company's success. I am committed to continuously learning and expanding my knowledge and expertise in these areas, as well as in other relevant technologies. I am enthusiastic about collaborating with a dynamic team to solve complex problems and achieve the company's goals. I am dedicated to developing my professional skills and advancing my career while delivering quality work and meeting deadlines.

## EDUCATION

**Bachelor in Industrial Technology**

**2018-2022**

Cebu Technological University – Barili Campus

Major in Computer Technology

## EXPERIENCE

**OJT – Legislative Office**

**20**

Barili, Cebu

As an OJT for the legislative department, my primary responsibility is to manage the files of scholarship students from CHED. This includes encoding their information into the system, organizing the files for easy access, and ensuring that all documents are up-to-date and accurate. Additionally, part of my role is to assist students in applying for the scholarship program by providing them with clear instructions on the application process and answering any questions they may have. I understand the importance of these tasks and will work diligently to ensure that all students receive the necessary support to successfully apply for and receive their scholarships.
